Felt AR3

\$3,500, [FeltBicycles.com](#)

The AR3 is cut from the same mold as the flagship Felt AR FRD, and is among the fastest road frames we have ever put in the wind tunnel. It offers a no-compromise ride quality despite all of the aero advantages, and at a price that's attainable. According to Felt, over 40 kilometers, at an average of 300 watts, the AR will save well over a minute compared to an identically spec'd Felt F1 road bike. The reversible seatpost gives the rider the ability to use the AR in multiple disciplines, allowing the rider to easily change saddle setback for time trials.

Frame: Carbon fiber; BB30 bottom bracket; carbon fiber dropouts; reversible seatpost; internal cable routing

Fork: Carbon fiber

Component Highlights: Shimano Ultegra 6800; Shimano Ultegra Direct Mount rear brake; Shimano RS31 wheelset; 3T ARX II stem; 3T Tornova handlebar; Prologo Zero II T2.0 saddle

Weight: 18.1 lb (56cm)

Pinarello Dogma F8

Cervelo S3 Ultegra D12

Colnago V1-R

BMC TMR02
