## FELT HISTORY

Felt Bicycles was founded on one principle: to design, develop and deliver the best bicycles in the world. Before starting his namesake company, and in addition to being an accomplished triathlete, Jim Felt was one of the top motorcycle mechanics in the world after having worked with industry leaders Honda, Suzuki, Yamaha and Kawasaki. When motocross champion and fitness guru Johnny O'Mara asked Felt to build him a triathlon bike, Felt was given the opportunity to put into practice many of the innovative designs he had dreamed about for optimizing rider position, handling and aerodynamics.

His work was so innovative that Easton Sports hired Felt as the company's product engineer and tasked him with creating an all-new bike for three-time Ironman World Champion Paula Newby-Fraser. Shortly after, she became four-time champion of the most prestigious race in triathlon. Jim Felt then launched his namesake brand, Felt Bicycles, and utilized his frame-building expertise to develop a complete line of road and time trial bikes. After partnering with bicycle industry veterans Bill Duehring and Michael Müllmann in 2001, Jim Felt was able to reach an even greater number of cycling enthusiasts than ever before by expanding into the realms of BMX, lifestyle, track racing and mountain bikes.

Each and every Felt bicycle features unique and innovative technologies that set it apart from its competitors, all in the name of Felt's original guiding principle. And with countless new and exciting projects on the horizon, that principle remains the same to this day and well into the future: to design, develop and deliver the greatest bicycles in the world.

## ATHLETE-INSPIRED, TECHNOLOGY-DRIVEN

At Felt Bicycles, we are passionate about road cycling in all its forms, and we are dedicated to racing. Felt road, triathlon and track bikes have guided the world's elite professional athletes to grand tour stage wins, world championships, Olympic gold medals, national titles, as well as the most dedicated enthusiast riders to countless amateur victories. And because of this relationship with the most committed athletes on earth, Felt Bicycles is able to utilize the knowledge gleaned from years of experience at the top level of the sport to develop revolutionary technologies to enhance the ride of all cyclists. Whether it's empowering riders to achieve their fitness goals, improve the quality of their commute or increase the thrill and satisfaction of a leisurely ride with friends, Felt's driving force is a commitment to racing-derived innovation.

Innovative manufacturing processes like InsideOut and MMC (Modular Monocoque Construction) reduce the weight and increase the durability of Felt's advanced performance road bikes, many of which feature the groundbreaking TeXtreme carbon fiber that further enhances their performance characteristics. Felt engineers utilize the latest technology, including CFD (Computational Fluid Dynamics) software and FEA (Finite Element Analysis) in order to maximize the balance of each and every road bike's pedaling stiffness and vertical compliance. And Felt's wind tunnel testing protocols are among the most advanced in the industry, which means that Felt performance road bikes outperform the competition both inside the lab and out on the road.

All of these efforts embody Felt's commitment to create the best road bikes on the planet. And with one of the greatest things about road cycling being the variety of roads to explore, whether they are well traveled or off the beaten path, Felt Bicycles provides the perfect bike for each and every road enthusiast.

## AR SERIES

Felt's pro road racers demanded the fastest bike imaginable for breakaways, sprint finishes and criteriums. So Felt's engineers set to work using computational fluid dynamics (CFD) software and the most stringent wind tunnel testing protocols in the industry. The result of their efforts is the AR, the most aerodynamic road frame that Felt Bicycles has ever produced. But because aerodynamics are only part of the racing equation, the AR was designed with a tapered steerer for optimal handling in any situation, along with maximum pedaling stiffness that's balanced with a ride quality tuned to minimize rider fatigue. The AR also features a unique, versatile seatpost that can be reversed to give triathletes the optimal, aero position. In an era obsessed with pursuing marginal gains at the expense of stiffness or handling, the AR makes zero compromises and is the best-performing aero road bike in the world.

## FR SERIES

The FR is the epitome of the modern road race bike. Featuring a refined version of Felt's legendary racing geometry that boasts impeccable handling characteristics, the FR also utilizes a precise level of compliance that ensures riders are fresh for a finish line sprint after a long day in the saddle. The FR also showcases several integration features that have been optimized for contemporary drivetrains and components, including an intuitive cable management system that complements the unique properties of wireless and wired electronic groups while maximizing the utility of mechanical drivetrains. The FR also allows riders to utilize tires up to size 28mm on select rims, and is available in both rim brake- and disc brake-equipped versions. This gives Felt racers more equipment choices than ever before.

## FRW SERIES

Meet the FRW, the ultimate road racing bike for the modern female athlete. The most dedicated cyclists demand a bike that delivers maximum performance, intuitive responsiveness and a perfect fit, and the FRW delivers on all fronts. Featuring the most refined version of Felt's legendary racing geometry ever, the FRW allows every rider to achieve her most powerful position. A highly tuned chassis supplies a precise level of compliance for long races and all-day training rides. A unique selection of components chosen for the anatomical needs of female athletes provides the perfect touch points for confident handling. Available in both rim brake- and disc brake-equipped variants, the FRW provides the most choice ever for racers worldwide.

## VR SERIES

The VR Series is the next step in the evolution of the endurance road bike. Featuring an ideal blend of compliance and performance-oriented stiffness, the VR incorporates an incredible degree of versatility befitting the modern endurance road cyclist. The VR features enough clearance for utilizing a variety of tire widths, giving you the option of running narrow slick treads for fast road rides, knobby rubber for off-road excursions, and everything in between. Endurance-oriented geometry designed around an upright riding position, combined with a newly developed seat stay configuration, offers enhanced comfort and more confident handling characteristics for long days in the saddle. Extend every ride and enhance your experience with the Felt VR.

## VRW SERIES

The VRW is the ultimate bike for the modern female endurance rider looking to tackle her next adventure. Featuring a meticulously crafted blend of comfort-oriented compliance and performance-minded stiffness, the VRW is an ideal companion for both short, leisurely spins and epic, all-day riding excursions. A unique, top tube-mounted storage solution and an optional, proprietary fender kit give endurance riders more freedom than ever to explore new roads and extend their rides further than ever before, in any environment or condition. Ample tire clearance and disc brakes empower the VRW and its rider with versatility and confidence, no matter where the road might lead.

## IA SERIES

The IA is the most aerodynamic bicycle in the world. Designed specifically for triathlon racing at the highest level of competition, the IA was developed using computational fluid dynamics (CFD) software and countless hours of testing in the wind tunnel. The IA also boasts a heretofore-unseen level of integration that includes an intuitive nutrition storage solution, user-friendly internal cable and wire routing and a cockpit design that offers a fit range to accommodate the needs of all athletes without sacrificing one gram of aerodynamic drag. The IA has propelled Felt professional athletes to victories at the Kona World Championship four years in a row. Best of all, Felt has adapted the IA's revolutionary aerodynamic efficiency across a diverse line to give every triathlete their fastest bike split ever.

# TT/TRI SERIES

The DA has long been a favorite among triathletes and time trialists the world over. The latest edition of Felt’s perennial time trial bike remains UCI-legal for all competitions, and includes the innovative vibration-reducing, aerodynamic seatpost design made popular by Felt’s AR aero road bike series. Its integrated front end makes for a high level of adjustment that can accommodate a wide range of cockpit solutions and fit needs. Ideal for any TT or triathlon course, the DA is the ultimate weapon of choice for riders looking to beat the clock. Featuring many of the aerodynamic benefits of the iconic DA time trial bike, both the B Series and S Series offers triathletes and time trialists another option for achieving their fastest ride ever. Crafted using industry-leading materials expertise and incorporating several of the aerodynamically optimized tube shapes developed for Felt’s most technologically advanced bikes, these models come complete with highly functional component selections that make them ready to race right from the start.

## TRACK SERIES

The Felt TA FRD is the most advanced track bike the world has ever seen. Featuring a breakthrough, asymmetrical airfoil design and a revolutionary left-hand drive system, the TA FRD has won both World Championship and Olympic medals. The TA FRD also features a level of integration that is rivaled only by its groundbreaking level of performance, and because of this integration, each TA FRD is tailored to the specific fit of each individual rider. The TK Series track bikes have been ridden to world championships and Olympic medals, and they're ideal for both the sport's top athletes and anyone looking to experience the thrill of racing inside the velodrome.

## CROSS SERIES

Mud, rocks, snow, sweat and pain. That's cyclocross. The toughest racecourses demand the best equipment, and that's why Felt created the World Championship-winning Fx series. With geometry tuned for the demands of the world's best cyclocross racers, the Fx offers incredibly responsive handling, optimal pedaling stiffness and an oversize front triangle for easy shouldering when tackling technical run-up sections. The Fx series also boasts plenty of versatility thanks to its dual water bottle mounting locations and ample frame clearance that can accommodate most modern 'cross and adventure tires. Available in both high-performance carbon fiber and rugged aluminum, all Fx models feature disc brakes for maximum performance in any weather condition. Whatever the 'cross course throws your way, the Fx has you covered.
